Tokens · gradients · buttons · badges · cards · marketplace

Color tokens

CHIPS AND HEX: LIGHT · DARK

LIGHT · DARK	TOKEN	HEX	USAGE
	bg-app	`#f4f6f4` `#0b0c0c`	Page background behind every screen. Cards sit on it.
	surface-card	`#ffffff` `#151716`	Default card, listing, table and sidebar surface. Text on it: ink, ink-muted.
	surface-raised	`#ffffff` `#1d2120`	Popovers, menus and hovered rows, one step above surface-card.
	surface-sunken	`#ebf0ec` `#0f1110`	Inputs, table headers, segmented-control tracks, grade C badges and disabled button fills.
	border-subtle	`#dfe5e1` `#262b29`	Hairline dividers and card outlines. Decorative only; never the sole edge of a control.
	border-strong	`#7f8a84` `#6b7570`	Outline buttons, input borders and checkbox edges. 3:1 or better on bg-app and surface-card in both themes.
	ink	`#14201a` `#f1f5f2`	Primary text on bg-app, surface-card, surface-raised and brand-tint.
	ink-muted	`#56615b` `#9aa39e`	Secondary text and labels on bg-app, surface-card and surface-sunken.
	brand-400	`#4cc081` `#4ade80`	Highlights, selected chart bar, glow accents. Graphic use only, never text.
	brand-500	`#1fa463` `#34d17b`	Chart lines, icons, progress bars, map fills. About 3.2:1 on white in Light: graphics only, never text, never behind white text.
	brand-600	`#12864b` `#22c55e`	Solid primary fill. Light: white text (4.6:1). Dark: on-brand text.
	brand-700	`#0b6b3a` `#16a34a`	Pressed and hover base, deep green blocks, focus emphasis.
	brand-900	`#0a3d24` `#06150e`	Deepest green: dark brand cards and the end stop of the brand card gradient.
	brand-tint	`#e4f5ea` `#10291d`	Tinted card, tonal button, success badge and Grade A badge background. Text on it: brand-ink or ink.
	brand-ink	`#0b6b3a` `#7cf0a8`	Green text and icons on bg-app, surface-card and brand-tint: tonal buttons, positive deltas, links, verified-seller mark.
	on-brand	`#ffffff` `#04130b`	Text and icons on brand-600 and on the primary gradient. Dark flips to near-black because the green is light.
	harvest-fill	`#d98a1f` `#f0a63a`	Warm accent fill for produce highlights, price tags, featured listings and the Grade B badge strip. Text on it: on-harvest. Not a status color.

Color tokens (continued)

CHIPS AND HEX: LIGHT · DARK

LIGHT · DARK	TOKEN	HEX	USAGE
	on-harvest	`#2b1700` `#2b1700`	Text and icons on harvest-fill (6.5:1 in Light, 8:1 or better in Dark).
	harvest-tint	`#fbefd9` `#2a1d0a`	Soft warm surface: Grade B badge, seasonal or featured callouts. Text on it: harvest-ink or ink.
	harvest-ink	`#8a4b00` `#f6b95c`	Warm text and icons on surface-card, bg-app and harvest-tint: price highlights, season labels.
	warning-fill	`#f9c623` `#f5c542`	Warning badge background and notification dot (alerts only; use harvest-fill for produce highlights). Text on it: on-warning.
	on-warning	`#2b2200` `#2b2200`	Text on warning-fill.
	warning-ink	`#8a5a00` `#f5c542`	Warning text and icons on surface-card and bg-app.
	danger-fill	`#c93636` `#ff6b5e`	Destructive button and count-badge background. Text on it: on-danger.
	on-danger	`#ffffff` `#2a0805`	Text on danger-fill.
	danger-ink	`#b42323` `#ff8a7e`	Negative deltas, error text, rejected bids and urgent alerts on surface-card and bg-app. Always paired with an arrow or the word.
	focus-ring	`#0b6b3a` `#7cf0a8`	2px solid focus outline, 2px offset. At least 3:1 on bg-app, surface-card and brand-tint in both themes.
	chart-moving	`#1fa463` `#34d17b`	Chart series 1: primary series, e.g. delivered lots. Label every segment; never rely on hue alone.
	chart-idle	`#f2b705` `#f5c542`	Chart series 2. Light value is about 1.9:1 on white (kept from the reference): always add a direct label or value beside it.
	chart-maintenance	`#f26b5e` `#ff7a6b`	Chart series 3, e.g. rejected or spoiled lots. About 3:1 on white; label it directly.
	map-high	`#1b9a5b` `#34d17b`	Choropleth map, highest bucket (Most).
	map-mid	`#8fd6ae` `#1f7a4b`	Choropleth map, middle bucket (Medium).
	map-low	`#d6f0e0` `#17382a`	Choropleth map, lowest bucket (Least).

Fonts load from Google Fonts in your app; this PDF shows type in a fallback face if Plus Jakarta Sans is not installed. The currency symbol is a placeholder.

Using the themes in code

LIGHT · DARK

One set of token names, two sets of values. Components never hard-code hex: they read tokens, so setting **data-theme** on the root (or on any container) switches everything inside it.

```
<link rel="stylesheet" href="tokens.css">
<link rel="stylesheet" href="components/bundle.css">
<html data-theme="light">  <!-- "light" or "dark" -->
```

```
// follow the OS by default, let the user override
const pref = localStorage.getItem('theme');
const sys = matchMedia('(prefers-color-scheme: dark)').matches ? 'dark' : 'light';
document.documentElement.dataset.theme = pref || sys;
```

```
<button class="btn btn--primary btn--lg btn--block">List your harvest</button>
<span class="badge badge--grade-a">Grade A</span>
<span class="price"><span class="price__amount">₹2,450</span><span class="price__unit">/ quintal</span></span>
<article class="card listing">...</article>
```

```
/* gradients: write once, theme-aware */
.my-cta   { background: var(--grad-primary); color: var(--on-brand); }
.my-hero  { background: var(--grad-hero);    color: var(--ink); }
.my-chart { background: var(--grad-chart-fill); }
```

Marketplace rules. Always show a unit next to a price or quantity. Grades are spelled "Grade A/B/C" and never rely on color. One primary action per region; on mobile it is btn--lg btn--block (48px). Use the warm harvest accent for featured or seasonal items and Grade B only, never for alerts. White text only on brand-600 or the primary gradient in Light; near-black on-brand text in Dark. brand-500 is for graphics, never text. Every chart segment gets a label and value. Keep the 2px focus ring.

Contrast, checked in both themes. Text pairs are 4.5:1 or better (ink and ink-muted 5.6:1 or better; white on the Light primary gradient 4.5:1 or better; on-brand on the Dark gradient 8:1 or better). The light chart yellow (about 1.9:1 on white) is kept from the reference and always labelled.

Placeholders. "Agri Market UI" is a placeholder name; the currency symbol (₹) and units (quintal, kg) are samples to swap for your market. Icons: use Lucide as the closest match to the reference screens.
